Forecast for Thursday 21 Jan 2021

Weather: Cloudy with outbreaks of light snow at first. The day will see occasional snow showers, these more frequent across western parts of Argyll and Lochaber, but more isolated towards the Trossachs. A few sunny interludes are possible, especially along the west coast and in the Trossachs. The winds will be strong enough to lift and blow any fresh snow so some temporary blizzard conditions are likely at height.

Chance of cloud free mountain/hill tops above 800m: 40%

Visibility: Good between showers, and away from cloud, falling poor in snow showers, occasionally very poor in any heavier showers or blowing snow. Cloud bases varying as showers pass through, perhaps dropping to 450m-600m at times and some longer periods of cloud on the Munro tops.
